

Find out how to keep your energy and water bills down with tips from

Sean Choolburra

Think about using a fan before you turn on the air conditioning. They cost 3 to 5 cents per hour to run, making them the cheapest cooling option!

Save \$300 a year by turning off the second fridge and freezer when you're not using them.

Don't pour money down the drain - instead of washing dishes under a running tap, turn it off and use a plug.

Switch to low-energy LED lighting. The bulbs last longer and you'll replace them less often.
